**1. Nature of Operations and Going Concern**

Honey Badger Exploration Inc. (the "Company") was founded in 1992 for the purpose of the acquisition, exploration, and development of mining properties. The Company's head office and the primary location of its registered records is 145 Wellington Street West, Suite 1001, Toronto, Ontario, M5J 1H8. The Company owns a wholly owned subsidiary 606596 Alberta Ltd. The Company is currently in the exploration stage and has not commenced any commercial operations.

As at June 30, 2017, the Company had a working capital deficit of \$699,658 (December 31, 2016: \$703,563) and an accumulated deficit of \$8,189,270 (December 31, 2016: \$8,193,175). These conditions cast significant doubt about the Company's ability to continue as a going concern.

The Condensed Interim Consolidated Financial Statements have been prepared on the basis of a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business.

In assessing whether the going concern assumption is appropriate, management considers all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company's ability to continue operations and fund its mining interest expenditures is dependent on management's ability to secure additional financing. Management is actively pursuing such additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

The Condensed Interim Consolidated Financial Statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore need to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying financial statements.

**2. Significant Accounting Policies**

*(a) Statement of compliance*

These condensed interim consolidated financial statements have been prepared in accordance and comply with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”) using accounting principles consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the IFRS Interpretations Committee (“IFRIC”). The accounting policies adopted are consistent with those of the previous financial year and the corresponding interim reporting period. Furthermore, the information on accounting standards effective in future periods and not yet adopted remains unchanged from that disclosed in the annual financial statements.

The condensed interim consolidated financial statements were approved by the Board of Directors on August 23, 2017.

*(b) Basis of presentation*

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that have been measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

*(c) Basis of consolidation*

These condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary 606596 Alberta Ltd., which is not active and has no assets in the current or prior year. All intercompany balances and transactions have been eliminated.

*(d) Significant accounting judgements and estimates*

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period.

Actual outcomes could differ from these estimates. The financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and also in future periods when the revision affects both current and future periods. Significant accounting judgments, estimates and underlying assumptions are reviewed on an ongoing basis.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could have an effect on the amounts recognized in the financial statements relate to the following:

*Going concern*

The preparation of the financial statements requires management to make judgments regarding the going concern of the Company as previously discussed in Note 1.

*Deferred Flow-Through Premium and Flow-Through Provision Estimates*

The assumptions and calculations used for estimating the fair values of the flow-through premiums and flow-through provisions as disclosed in Notes 6 and 7.

**12. Capital Management**

As of June 30, 2017, the Company had a working capital deficit of \$699,658 (December 31, 2016: \$703,563).

There were no changes in the Company's approach to capital management during the six-month period ended June 30, 2017.

In managing liquidity, the Company's primary objective is to ensure the entity can continue as a going concern while raising additional funding to meet its obligations as they come due. The Company's operations to date have been funded by issuing equity. The Company expects to improve the working capital position by securing additional financing.

The Company's investment policy is to invest excess cash in very low risk financial instruments such as term deposits or by holding funds in high yield savings accounts with major Canadian banks. Financial instruments are exposed to certain financial risks, which may include currency risk, credit risk, liquidity risk and interest rate risk.

The Company's mineral property interests are all in the exploration stage, as such the Company is dependent on external financing to fund its exploration activities and administrative costs. Management continues to assess the merits of mineral properties on an ongoing basis and may seek to acquire new properties or to increase ownership interests if it believes there is sufficient geologic and economic potential.

Management mitigates the risk and uncertainty associated with raising additional capital in current economic conditions through cost control measures that minimizes discretionary disbursements and reduces exploration expenditures that are deemed of limited strategic value.

The Company manages the capital structure (consisting of shareholders' deficiency) on an ongoing basis and adjusts in response to changes in economic conditions and risks characteristics of its underlying assets. Adjustments to the Company capital structure may involve the issue of new shares, issue of new debt, acquisition or disposition of assets, or adjustments to the amounts held in cash, cash equivalents and short-term investments.

The Company is not subject to any externally imposed capital requirements other than flow-through spending commitments.

**13. Financial Instrument Risk Factors**

The following disclosures are to enable users of the financial statements to evaluate the nature and extent of risks arising from financial instruments at the end of the reporting year:

**a) Credit risk**

The Company's credit risk is the risk of counterparty default on cash and cash equivalents held on deposit with financial institutions. The Company manages this risk by ensuring that deposits are only held with large Canadian banks and financial institutions. The Company's accounts receivable are sales tax receivables with negligible counterparty default risk.

**b) Liquidity risk**

The Company's liquidity risk is the risk that Company has insufficient funds to settle its contractual financial liabilities. The Company manages this risk by ensuring sufficient funds are available as contractual cash flows become due.

As at June 30, 2017, the Company had a cash balance of \$35,333 (December 31, 2016: \$51,263) to settle current liabilities of \$751,780 (December 31, 2016: \$797,583). As a result, the Company is exposed to liquidity risk.

While the Company has been successful in obtaining required funding in the past, there is no assurance that future financings will be available.

**c) Market risks**

The Company's market risk arises from changes in interest rates and commodity prices that could have an impact on profit or loss. This includes:

- Interest rate risk, is the sensitivity of the fair value or of the future cash flows of a financial instrument to changes in interest rates. The Company does not have any financial assets or liabilities that were subject to variable interest rates.
- Commodity price risks, particularly with respect to diamonds, is the sensitivity of the fair value of or of the future cash flows of mineral assets. The Company manages this risk by continually monitoring base and precious metal prices and commodity price trends to determine the appropriate timing for funding the exploration or development of its mineral assets, or for the acquisition or disposition of mineral assets.
- Currency risk, is the sensitivity of the fair value or of the future cash flows of financial instruments to changes in foreign exchange rates. The Company does not have any financial assets or liabilities that were subject to variable foreign exchange rates and as such the Company is not subject to currency risk.
